***Green to Cedar River Regional Trail***

This project will improve an 11.3-mile corridor of existing soft-surface and unimproved trail corridor to a full standard shared-use trail, from the Cedar River Trail in Maple Valley to Flaming Geyser State Park on the Green River. The trail would provide improved non-motorized access to parks, neighborhoods and commercial areas in the communities of Black Diamond, Maple Valley and unincorporated King County. This project is a partnership with the cities of Black Diamond and Maple Valley. The project is divided into two segments: the north segment is 3.25 miles in length and travels from the existing Cedar River Trail to SE Kent Kangley Road. The south segment is 8.1 miles in length and travels from SE Kent Kangley Road to Flaming Geyser State Park. The first phase of the project will include design, public outreach and permitting for the entire corridor.

- 30% design of entire 11.3 mile corridor: February 2015-July 2016
- Construction of north segment: September 2017-April 2019

**Metro Transit*****Alternative Transit Service Study***

Metro's Five Year Implementation Plan for Alternative Service Delivery has identified a portion of SE King County & Maple Valley, including the SR-169 corridor, as a candidate area for a potential demonstration project. The project's objective is to evaluate the feasibility of alternative transportation services that could provide the same or an improved level of mobility in the community, at less cost than existing fixed route services.

- Planning and outreach from March 2015 through October 2015. Any new service would begin in March 2016.

Doug Johnson - 206.477.5837 • doug.johnson@kingcounty.gov

***Service Guidelines Task Force***

In 2010, King County formed a Regional Transit Task Force which recommended that Metro create objective, data-based guidelines for planning and managing transit service. Metro responded to this recommendation, and the King County Council adopted Metro's strategic plan and service guidelines in July 2011.

Now, after several years' use of the service guidelines in transit planning, the King County Council has asked Metro to form a new task force to further analyze how transit service is evaluated and allocated. Specifically, the Council asked the task force to review and make recommendations regarding:

1. How transit service performance is measured to reflect the varied purposes of different types of transit service.
2. Approaches to evaluating how the goal of geographic value is included in the guidelines, including minimum service standards.
3. Approaches to evaluating how the goal of social equity is included in the guidelines.
4. Financial policies for purchase of additional services within a municipality or among multiple municipalities.
5. Guidelines for alternative services implementation.

The Service Guidelines Task Force, comprised of 33 executive level participants, will do this work in the first part of 2015 so that it can influence development of both Metro's long-range plan, scheduled to be complete by mid-2016, and its service guidelines update, scheduled to be complete by April 2016.

***Metro Long Range Plan***

With King County growing fast, it's time to lay the foundation for a public transportation system that moves more people and moves them better. What should our transit system look like in 25 years? How can we support our economy, our environment, and the people who live here? How will Metro integrate with the expanding light rail system? These are the kind of questions that captured the imagination of

**Department of Transportation Cont'd.**

civic leaders years ago, and their vision led to the public transportation system we rely on today. Now it's time to imagine a new future.

Metro's long range plan will present a shared vision for a future public transportation system that gets people where they want to go and helps our region thrive. The plan will describe an integrated network of transportation options, the facilities and technology needed to support those services, and the financial requirements for building the system. It will be developed in close coordination with Sound Transit and other transportation agencies.

Over the next two years, Metro will work with transit riders, cities, community groups, and motorists to shape a long-range plan for meeting our region's growing and changing public transportation needs.

## King County Sheriff's Office Cont'd.

assault, robbery and sexual assault investigations, as well as a variety of other services including concealed weapons licensing, fingerprinting, etc.

Under Sheriff Urquhart's leadership, the Sheriff's Office transitioned to a Precinct Model for deploying deputies beginning in 2013. This returned formal roll calls and gave sergeants the opportunity to work with their deputies on crime trends, protocol, procedure, and values.

Deputies are now assigned to fairly consistent patrol areas. This allows them to become familiar with citizens, businesses, and residential areas in their assigned patrol districts. They are expected to build relationships and learn the particular problems in an area or neighborhood, as well as focus on crime trends.

Precincts are referred to as Precincts #2, #3, & #4...or Northeast, Southeast, and Southwest, respectively. Precinct #2 is in Sammamish City Hall, Precinct #3 is in the Hicks Raburn Precinct building in Maple Valley, and Precinct #4 is in Burien.
